

# How to Download DaVinci Resolve

## Step 1

Click on the link below and it will take you to the DaVinci Resolve website which should look like this:

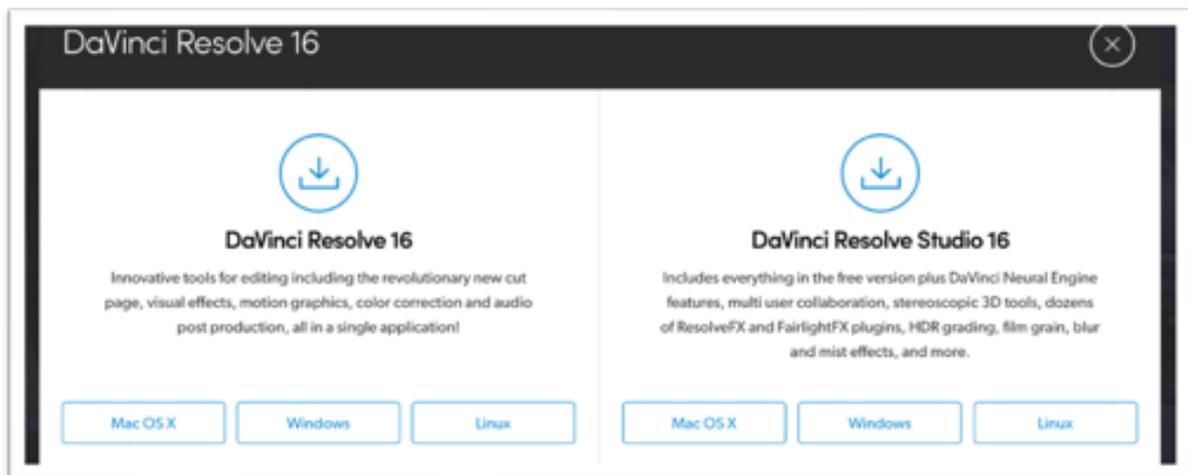

<https://www.blackmagicdesign.com/uk/products/davinciresolve/>

## Step 2

Click on the 'Download' icon under the main title. It will then show you a pop-up screen that will look like the photo below.

Make sure to use 'DaVinci Resolve 16' as this is the free version.

Then click on whatever computer software you have (Mac OS X / Windows / Linux).

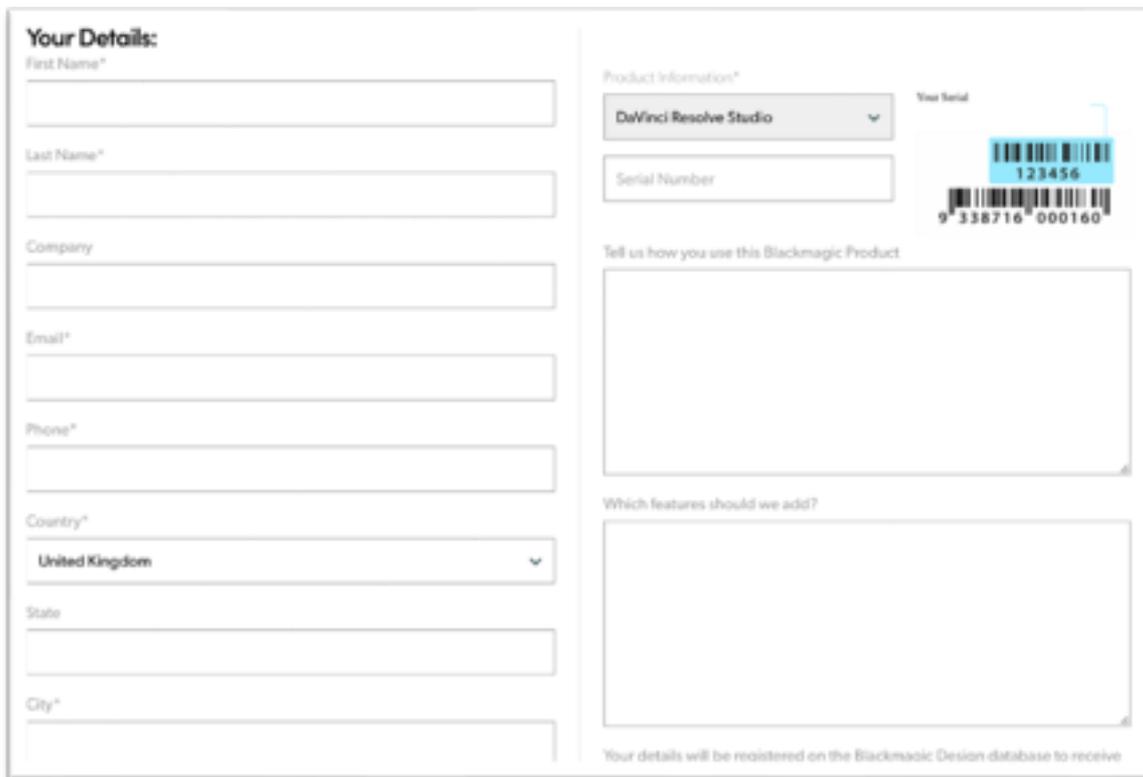

### TIP

Make sure your computer is up to date in its software, as I had to update my MacBook Air to MacOS Catalina which took a long time!

### Step 3

You can either put in your details and then press 'Register & Download' or you can just press 'Download' where you don't need to type in any personal details.

Once you press either button the download should start automatically. If it doesn't, a link will show on the screen to start the download.

The registration form is divided into two main sections: 'Your Details' and 'Product Information'.

**Your Details:**

- First Name\* (text input)
- Last Name\* (text input)
- Company (text input)
- Email\* (text input)
- Phone\* (text input)
- Country\* (dropdown menu, currently showing 'United Kingdom')
- State (text input)
- City\* (text input)

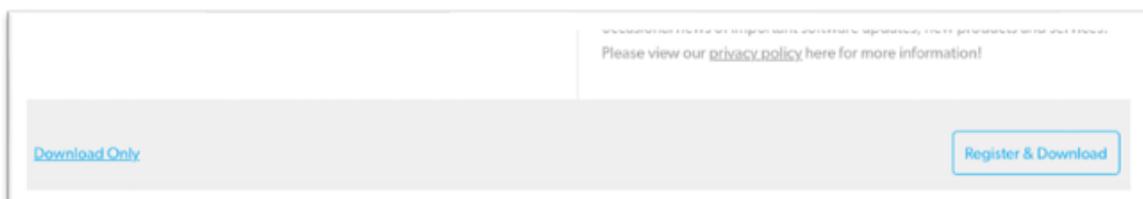

**Product Information:**

- Product Information\* (dropdown menu, currently showing 'DaVinci Resolve Studio')
- Serial Number (text input)
- Your Serial (text input, containing '123456', with a barcode below it showing '9 338716 000160')

**Feedback:**

- Tell us how you use this Blackmagic Product (text area)
- Which features should we add? (text area)

Your details will be registered on the Blackmagic Design database to receive

Please view our [privacy policy](#) here for more information!

[Download Only](#) [Register & Download](#)

## **Step 4**

Once the download is complete it should come up with a welcome tab to briefly explain the software and each section.

Once you have finished with the welcome tab it will take you to the full software where you can begin to edit.
